Took out "quickly" and caught a typo.

Hi Nancy,

Please let me know if you are ok with this version. I will send to The Intercept; Encore mag; and StarNews.

EPA is committed to protecting public health and supporting states and public water systems as the appropriate steps to address the presence of GenX in drinking water are determined. Under the Safe Drinking Water Act, EPA undertakes extensive evaluations of contaminants and uses the best available peer reviewed science to identify and regulate contaminants that present meaningful opportunities for health risk reduction. While EPA has not established a drinking water regulation, health advisory or health based benchmark for GenX in drinking

water, the agency is working closely with the states and public water systems to determine the appropriate next steps to ensure public health protection.
